

WHOLESALE HARDWOOD INTERIORS

Architectural Mouldings & Millwork

WHI

Wholesale Hardwood Interiors, Inc. (WHI) has built its success and reputation upon its dedication to high standards of quality, service, and integrity.

Quality: We are confident that you will be pleased with the quality of material and workmanship you will find with our products. Our reputation is built on the level of expertise we provide.

Service: WHI is committed to the needs of our customers. Our goal is to provide one-on-one assistance through your personal Account Executive to our in-house office and warehouse team so that your project exceeds expectations.

Integrity: From our employees and staff, to our Account Executives, to the products that go out the door, we want your buying experience with WHI to be pleasing from start to finish and conducted with the utmost respect and integrity.

We accept the responsibility to create added value for those who entrust us with their business or home. We strive to effectively meet our customers' ever-changing needs. WHI realizes we must consistently meet the demanding guidelines for quality and service that we developed many years ago and our customers have come to expect.

Wholesale Hardwood Interiors strives to exceed your expectations in quality, service and integrity.

Mike Judd, President

Custom Millwork

Wholesale Hardwood Interiors prides itself in making your dreams a reality. Our custom millwork department is hard at work creating a variety of specialty items. Whether it is a photograph you provide or a computer-aided design we produce, we are ready to take on your project.

Your account executive along with our design team will help you create the beautiful look you are imagining. Commercial or residential, our commitment is high quality detailed workmanship.

- Hand-crafted fireplace mantels and book casings.
- Home entertainment cabinetry and cabinet doors.
- Office hardwoods and coffered ceilings.
- Colonial arched jambs, doorways, and curved mouldings.
- Interior pediment headers and custom transoms.
- Decorative accent walls and ceilings.

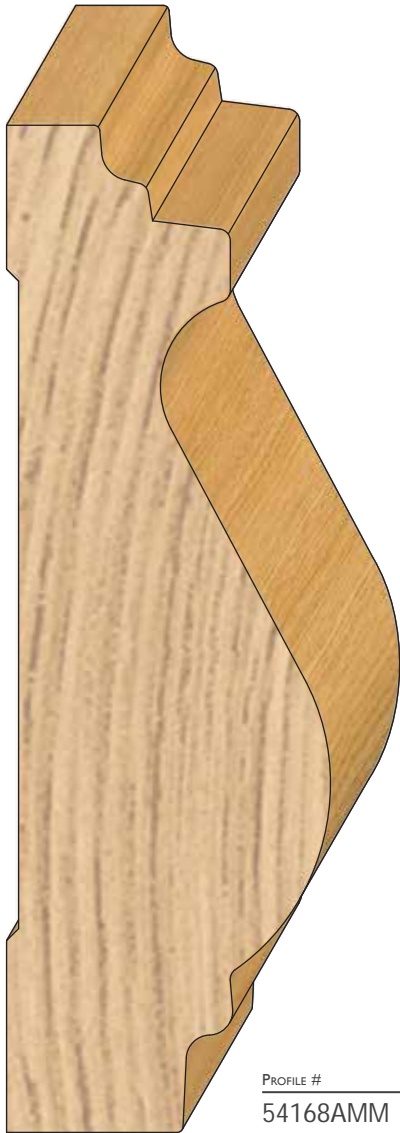

If you can dream it, we can create it.

ARCHED JAMBS INFORMATION

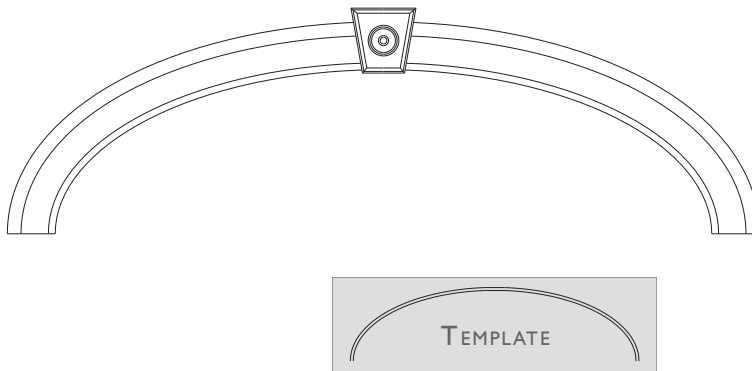

WHOLESALE HARDWOOD INTERIORS, INC.

EYELID ARCH

The Eyelid Arch is a segment of a True Half Circle. When calculating measurements for this arch include the following:

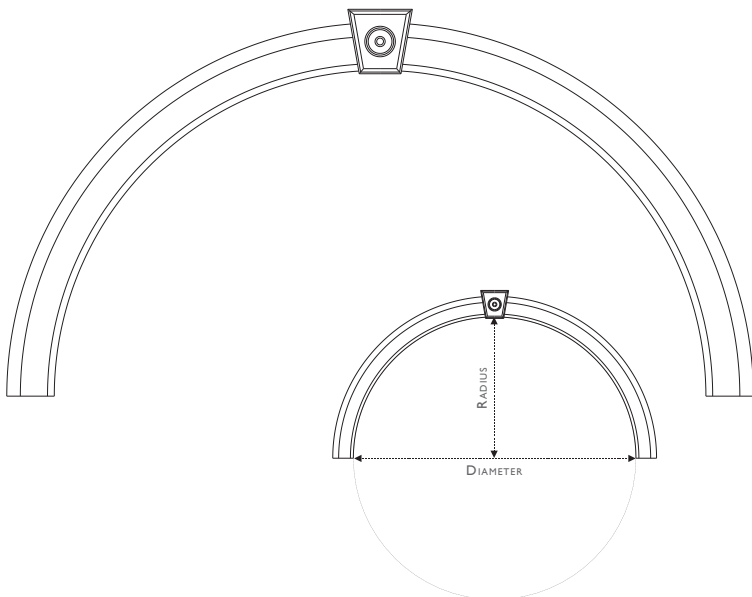

1. The chord.
2. The rise.
3. Special instructions.

ELLIPTICAL ARCH

The Elliptical Arch is a combination of at least two radii. When calculating measurements for this arch include the following:

1. Template is required.

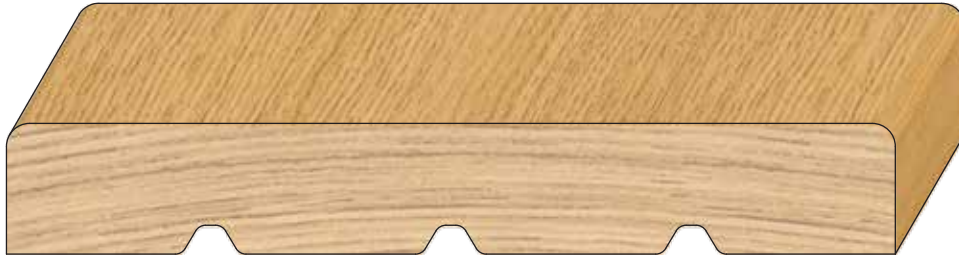

TRUE HALF CIRCLE ARCH

The True Half Circle Arch is as its name describes, a true half circle. When calculating measurements for this arch include the following:

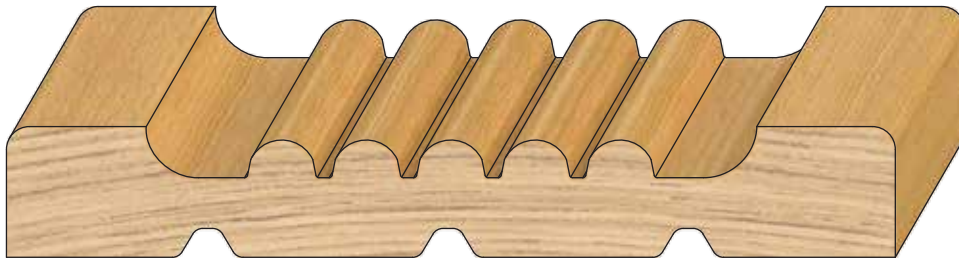

1. The diameter.
2. The radius.
3. Special instructions.

THE ADVANTAGE OF PRIMED MDF

Being *MADE IN AMERICA* utilizes a domestic supply chain which provides the high level of responsiveness required to be successful in today's ever-changing market. Not only does domestic sourcing provide faster response times and more opportunity for customization specific to your needs, but it also promotes job growth and community development right here in the USA!

INSTALLING PRIMED MDF

- Store mouldings on the jobsite flat, and up off the floor to prevent material from getting wet and drawing moisture.
- Prior to installation, mouldings should be stored in room conditions for a minimum of 48 hours. Contrary to popular belief, MDF can expand and contract due to changes in relative humidity, so acclimation is very important.
- When ripping, cutting or routing, carbide tipped blades and/or cutter heads are strongly recommended.
- Pneumatic fastening systems with the air pressure set at 90 – 120 PSI works best.
- The types of fasteners that work best are 16-18 gauge finish nails. Smooth shank nails are not recommended. However, it is up to the installer to decide what works best for his own application.
- MDF is a man-made product that is excellent for face nailing (1" from ends and ¼" from edges is recommended). Edge nailing is not recommended.
- The use of a fast-drying adhesive, such as our Kwik-Bond Adhesive and Activator, helps to prevent the separation of mitered corners. Another option for applying casing around doors and windows is to use casing corner blocks. In this application, the use of glue is not required.

MEDIUM-DENSITY FIBERBOARD (MDF):
ENGINEERED FROM RECYCLED WOOD PRODUCTS, GLUED AND PRESSED TO GENERATE A PREFERRED BUILDING MATERIAL.

PRIMED:
A SMOOTH PRE-APPLIED UNDERCOAT, EASY AND READY TO PAINT.

FINISHING PRIMED MDF

Wholesale Hardwood Interiors' Primed MDF mouldings are coated with a high-quality water based acrylic latex primer. Any high-quality water, oil, or lacquer based topcoats will work to produce a good finished product. (For best results, follow the paint manufacturer's instructions regarding product use.)

Wholesale Hardwood Interiors' Primed MDF mouldings have an exclusive finish process with a double prime and double profile-sand manufacturing process which results in a smoother finish, decreasing in-field finishing time and associated costs.

FOR BEST RESULTS WITH PRIMED MDF

- Fill and seal all nail holes.
- Lightly sand with fine grit sandpaper or a piece of Scotchbrite.
- Wipe down the surface of the moulding that is going to be painted with a tack cloth to remove any excess dust left from sanding.
- Apply the first coat of premium paint.
- Lightly sand again with fine grit sandpaper or Scotchbrite to help the second coat of paint adhere to the first.
- Wipe down the moulding with a tack cloth to remove any dust from sanding.
- Apply a second coat of premium paint.

PRIMED PINE

In conjunction with Primed MDF, Wholesale Hardwood Interiors offers Primed Pine. Primed Pine allows customers to have an alternate wood option that is primed and ready for painting.

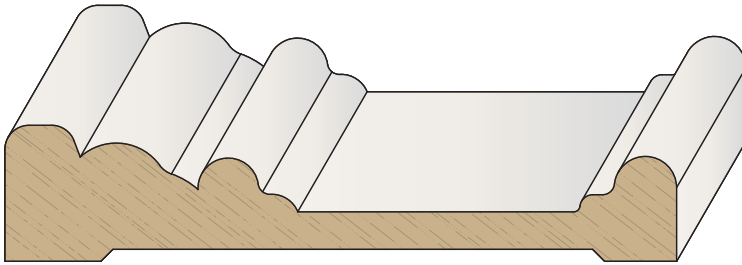

* SEE PAGES 48-53 FOR PRIMED PINE PROFILES.

Y

WHI's Design Team has been drawing custom products since our inception in 1985. Above are a few drawings that became a reality for some of our satisfied customers.

WHI's "The Shop" is where these drawings come to life. Years of skill and craftsmanship have gone into making The Shop what it is today. We invite you to find craftsmen that can compete with the level of expertise our shop has to offer.

X

General Information

Moulding Tips

- Before finishing, lightly sand all material.
- Due to moisture control issues, we recommend that all surfaces and edges be finished as quickly as possible.
- It is recommended to keep all interior mouldings and millwork inside a humidity controlled area while on the job site. To ensure proper moisture content, it is best to allow the material to acclimate for several days prior to installation. If you are unable to store the material in a humidity-controlled area, please keep the material off the floor. This will help prevent the material from gaining moisture from uncured concrete or a wood floor with a higher moisture content. When those conditions exist, it is best to use a vapor barrier such as a sheet of plastic to cover the material on top and bottom when it is not in use.

Lengths

- All clear hardwood species are supplied in random lengths between 3' and 16' depending upon the item. Due to these random lengths in clear species, it is acceptable to ship up to 10% overage. Finger joint poplar material is supplied in 14' through 16' lengths, also depending on the item. Finger joint items may have up to 5% of the lengths shorter than 14' and 16'.
- MDF is typically 16' in length. Some casing profiles also come in 7' precuts, 10' and 14' lengths.
